

ECOCONSERVE

REBUILD. PROTECT. CONSERVE.

Club Paradise Palawan takes proactive measures to help protect and sustain the environment. Join us in our advocacy to nurture nature.

Turtle Nesting Site

Our shores serve as nesting sites for Hawksbill Sea Turtles and Green Sea Turtles. Nesting turtles visit every year from November to January. Approximately 200 hatchlings are released back to the ocean.

The Discovery Scouts

Our Kids Program is geared towards developing the little ones' love for Mother Earth. Afternoon activities start at 4PM daily at the Tree House

Marine Protected Sanctuary

We are Sea Guardians. Protecting the surrounding waters of the island against illegal fishermen and caring for our reef protects the health and conservation of our marine ecosystem.

Sustainable Dishes

Firefish Restaurant and Lounge offers international and homegrown comfort dishes utilizing ingredients from sustainable sources.

Water Desalination

In the pipeline is the construction of a Desalination Plant to ensure a drought-proof, alternative water supply in the island.

Our Green Garden

Our green garden located at nearby Taranuman Farm produces fresh herbs and vegetables so guests can enjoy farm to table dishes at Firefish Restaurant

Garbage Management

Color-coded garbage bins are located around the resort for proper garbage disposal. A clean environment is a healthy environment.

Tree Care

Trees absorb carbon dioxide from the air well as other potentially harmful gasses, they also create an ecosystem to provide habitat and food for birds and other animals. At Club Paradise Palawan we care for our trees as they are home to many exotic wildlife.

Clean Up

We take an active role in the preservation and cleaning up of the beach as well as the ocean to aid in its conservation. If you wish to join us, the Clean Up schedules are available at the Front Desk.

Gentle Reminders

- Smoking is only allowed at designated areas of the resort.
- Swim with the Turtles, do not ride on them or feed them.
- Corals are home to various marine species, do not step on them.
- Fishing is not allowed within the perimeter of the island.
